

Your Help is Requested

An educational proposal is being prepared for submission to the Queen Anne's County Board of Education that we believe will greatly enhance the offerings currently offered to our young students.

Our commitment is to prepare students for their future. We will ensure that students acquire core knowledge and the tools of learning to be successful in school and careers. We will challenge students to always strive to meet high standards in scholarship and behavior and the values of integrity and respect for self and others.

We are local parents and grandparents, educators, business and other community leaders seeking to provide an educational alternative within the public school system. Our focus and educational plan are to ensure Queen Anne's County students are proficient in reading and math. We will also focus on achieving proficient levels of knowledge of American history and civics.

We need your help in signing a petition expressing your support for this concept that would be submitted with a proposal to the Board of Education for a Queen Anne's County Classical Charter School (QACCS) during the application period in 2025. Once we receive approval of our proposal and receive our charter, we will complete renovation or construction of a school building, recruit teachers and administrative staff and recruit students through outreach to parents in the County to inform them about this educational enhancement.

QACCS will provide a classical education consisting of a content rich curriculum, proven teaching methodologies and the practice of basic moral virtues of honesty, integrity and respect. We will teach the development and importance of Western Civilization. We will maintain our commitment to school leadership over the coming years and will bring to our school community more successful and dedicated individuals with varied expertise.

Thank you for your consideration.
